Project: Acotis Diamonds

Description:

Acotis Diamonds is an online luxury jewelry store. The project focused on delivering a user-friendly and elegant shopping experience with seamless navigation, real-time product filtering, and secure payment integration. The goal was to enhance UI/UX and optimize the performance of the Shopify store.

Roles & Responsibilities:

- Customized Shopify theme using Liquid, enabling dynamic section and block management from the admin panel.
- Developed and maintained interactive UI components using JavaScript and jQuery to enhance product browsing (e.g., real-time filtering, image galleries).
- Created custom styles using CSS and SCSS to ensure brand consistency, responsiveness, and crossbrowser compatibility.
- Integrated payment gateways and optimized the checkout process to provide a smooth and secure shopping experience.
- Improved overall website performance and page load speed, resulting in better customer engagement and SEO performance.
- Conducted thorough testing and debugging to ensure an error-free user experience across all major devices and browsers.

Technologies Used:

- Shopify Liquid
- JavaScript
- jQuery
- HTML5 / CSS3 / SCSS
- Shopify Admin & Theme Editor
